OBJECTIVE

I am MCA postgraduate student my name is Ajinkya Surase and enjoy learning by building things. I am particularly interested in backend and full-stack development. I am looking for a Software Developer / Full-Stack Job or Internship where I can continue learning, improve my problem-solving skills, and contribute to real-world projects while working with an experienced team.

Technical Skills:

Programming: Python, JavaScript

Frontend: React.js, HTML5, CSS3.

Backend: Django, Django REST Framework (DRF)

Database: MySQL, SQLite

Data Visualization: NumPy, Pandas, Data Cleaning, Basic Visualization.

Tools: Git, GitHub, VS Code

Concepts: REST APIs, Authentication & Authorization, MVT Architecture, CRUD Operations

Education:

Master of Computer Applications (MCA)

Dr. D. Y. Patil Technical Campus Talegaon, Pune (2023 – 2025)

Bachelor of Science (BSc – Mathematics)

Arts, Commers & Science College Sonai (2020 – 2023)

Academic projects:

Student Attendance Management System

The system allows secure login for admin and faculty, manages students and courses, enables daily attendance marking, and generates monthly attendance reports. I designed the database using Django ORM, created REST APIs using DRF, and built the frontend using React. Working on this project gave me a clearer understanding of how frontend, backend, and database layers work together and improved my confidence in backend development.

Task Management System

The system supports user login, task assignment, status tracking, deadline management, and a simple dashboard. Through this project, I learned how workflow management systems are designed and how small features like task status and deadlines make a big difference in usability.

CERTIFICATIONS / COURSES

Data Visualization using Python Under Anudip Foundation (NumPy, Pandas, Data Visualization)

SOFT SKILLS

Problem-solving, Analytical thinking, Quick learner, Team collaboration, Clear communication, Adaptability
