Professional Summary

Entry-level Java Full Stack Developer with hands-on experience in building scalable web applications using Java, Spring Boot, Angular, and MySQL. Proficient in REST API development, JWT-based authentication, database design, and frontend development.

Education

Sipna College of Engineering and Technology, Amravati

Jun 2020 – May 2024

Bachelor of Engineering - Information Technology (CGPA : 7.93)

Amravati, Maharashtra

Technical Skills

Languages: Java, JavaScript, SQL

Frontend: Angular, HTML5, CSS3, Bootstrap

Backend: Spring Boot, Hibernate

Database: MySQL

Concepts: OOP, MVC Architecture, REST API Design

Development Tools: Git, Postman, VS Code, Eclipse, Spring Tool Suite, MySQL Workbench

Professional Experience

SETTribe IT Solutions

Jan 2025 – Jul 2025

Trainee Software Engineer

- Developed a centralized governance dashboard to display school details, agriculture schemes, Anganwadi data, and complaint modules for Zilla Parishad Nagpur.
- Designed and implemented MySQL database structures to manage and retrieve multi-department public service data efficiently.
- Built responsive and user-friendly UI using HTML, CSS, JavaScript, and Bootstrap for citizens and administrative users.
- Configured authentication and form handling to support secure data submission and role-based access.

Projects

Gaming Gear Hub | *Spring Boot, Angular, MySQL* | [Live Demo](#) | [GitHub](#)

- Built a full-stack e-commerce platform for gaming accessories with role-based access for Admin and Users using Spring Boot and Angular.
- Implemented secure REST APIs with JWT-based authentication and authorization for user login, product management, cart, and order processing.
- Implemented Admin dashboard with complete CRUD operations for products, users, and orders, backed by optimized MySQL database design.
- Integrated shopping cart, product search & filters, and Razorpay payment gateway, ensuring responsive UI and smooth checkout experience.

DoMore | *Spring Boot, Angular, MySQL* | [Live Demo](#) | [GitHub](#)

- Built a web application using Angular for frontend and Spring Boot for backend development.
- Created multiple integrated modules including Task Management, Money Tracker, Weather Updates, Event Planning and more additional features.
- Designed REST APIs with Spring Boot for efficient data management, real-time updates across all modules.
