Resume

Description : Developed an AIpowered Resume Analyzer with React Native, React.js, Node.js, Express.js, Python FastAPI, andMySQL to automate resume screening and ATS evaluation. Implemented JWTbased authentication, rolebasedaccess, resume parsing, job description matching, ATS score calculation, keyword extraction, and missing skillidentification using AINLP techniques. Integrated RESTful APIs to provide personalized resume improvementsuggestions and recruiterbased candidate ranking. Designed a secure, scalable, and crossplatform solution tostreamline the recruitment process and improve resumefjob matching.The AIBased Resume Analyzer ATS Scorer Screening System is an intelligent application that automates resume screening using Artificial Intelligence and Natural Language Processing. It allows job seekers to upload resumes and recruiters to provide job descriptions for evaluation. The system extracts key details such as skills, education, and experience, and compares them with job requirements using keyword and semantic matching. Based on this analysis, it generates an ATS score to measure candidate suitability. It also identifies missing skills and provides recommendations to improve the resume. The system helps recruiters shortlist candidates efficiently while reducing manual effort. All data is securely stored and managed in a database. The project is developed using technologies like React Native Frontend, Spring Boot Backend, MySQLDatabase, and Python ML, NLP libraries like NLTK or SpaCy, making the hiring process faster and more effective.
